

PAR-KY[®]

your natural wood floor

speed of installation
 simplicity of installation
 lifespan / durability
 attractive prices
 under floor heating
 product range
 possibility of refinishing
 warmth / character

PAR-KY is a veneer flooring with a thin layer of real wood, called veneer. The real wood top layer shows unique patterns, rich colour variations, beautiful light reflections and lively three-dimensional effects. Because of this it is possible to distinguish the natural product from its imitations, such as laminate. Moreover a veneer flooring radiates warmth and luxury and is easy to maintain. PAR-KY veneer flooring is an excellent choice for someone who builds or renovates.

PAR-KY BY SHINNOKI is the showpiece of the PAR-KY collection. The 6 fashionable colours form a perfect match with the latest trends in interior decoration. The colours have been developed after an international colour survey for the SHINNOKI panels. The uniformity in colour between the panels and the floor boards makes it possible to tune various elements of your interior such as flooring, walls, furniture, ...

SOUND

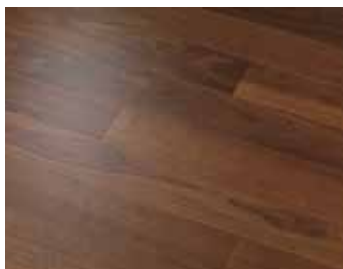

The **SOUND** collection emphasizes on exclusive wood species. These exclusive wood species are often unstable and very expensive as solid flooring. However, these species are achievable and affordable as a veneer flooring. The long, rangy boards in combination with a small bevel and a brushed or sealed finish, results in a luxurious aura. Moreover the sealed finish gives extra protection for intensive use. Due to the thick cork backing you sense a 'solid' sound while walking on the floor.

PRO

The **PRO** collection scores optimal in the price/quality proportion. It is a collection with more traditional wood species available in plank or 2-strip. The collection consists of short, wide boards with satin and sealed finish.

LOUNGE

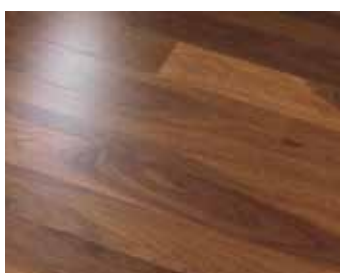

The **LOUNGE** collection is the most suitable for intensive use. The veneer is glued on an ultra-strong high density fibreboard (HDF) which resists against heavy dents. This collection is finished with 8 layers of ultra-hard lacquer. This lacquer system makes resanding unnecessary. Therefore the LOUNGE collection is most suitable for projects. The short, small boards in combination with a small bevel gives the veneer flooring an exclusive aura. The sealed boards are satin lacquered and the brushed boards are matt lacquered.
