WOOD AND WPC OUTDOOR FLOORING

Welcome to Exterra *by Alpod*

DISCLAIMERS

Color and grain variation - Actual product color, texture, and grain may vary from printed images or samples due to production batches, lighting conditions and digital/print display limitations. We recommend viewing an actual sample before making a final selection.

Sample representation - Samples are intended to illustrate general characteristics only. Slight differences in color and pattern may occur between samples and delivered products.

Created for
outdoor living.

PRODUCT SPECIFICATIONS

NEW

EXTERRA WPC 3D EMBOSSED WPC BOARDS

Natural beauty. Engineered performance.

4th Generation WPC Decking. The authentic look of natural wood, enhanced by deep 3D embossing and protected by an extra-thick wear layer. Exterra 3D Embossed delivers exceptional durability, long-lasting performance and effortless maintenance for modern outdoor living.

EXTERRA WPC WPC CO-EXTRUDED DECKING

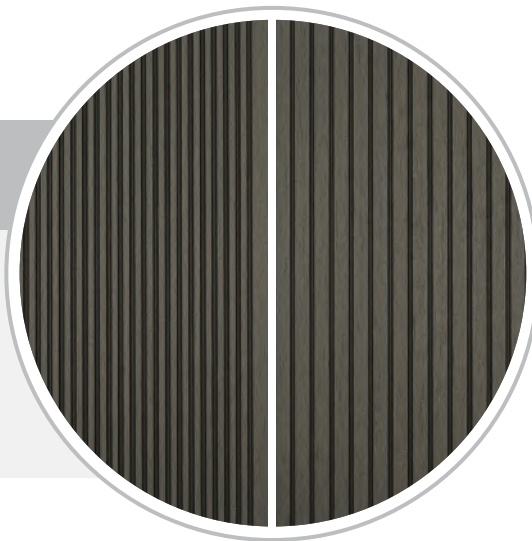

Dual-sided versatility. Enhanced protection.

Featuring a durable co-extruded protective shield, Exterra Co-Extruded Decking offers enhanced resistance to moisture, stains and UV exposure. Its reversible design provides two attractive surface finishes, combining design flexibility with lasting performance and easy maintenance.

EXTERRA WPC WPC CLASSIC DECKING

Classic style. Proven performance.

Designed for everyday outdoor living, Exterra WPC Classic Decking combines classic appearance of boards with the durability of composite technology. Its classic grooved profile, weather resistance and low-maintenance surface make it a reliable choice for any outdoor space.

EXTERRA TIMBER NATURAL WOOD DECKING

Crafted by nature. Built to last.

Crafted from carefully selected hardwoods, Exterra Natural Wood Decking brings timeless beauty and authentic character to outdoor spaces. Every board is unique, offering exceptional durability, natural elegance and a warm, premium appearance that endures for years.

FEATURES GUIDE

Benefits at a glance.

The following icons highlight the key features and benefits available across the Exterra decking collection, making it easy to compare technologies, materials and performance. As features vary by product and material, only the icons shown on each product page apply to that specific decking solution.

Whether you choose composite or natural wood, Exterra decking is engineered to withstand the elements while maintaining its beauty with minimal maintenance for years to come.

WATERPROOF

Resistant to water and moisture for reliable outdoor performance.

NATURAL WOOD LOOK — DEEPER EMBOSSING

Deep 3D embossing creates an authentic wood texture with a natural look and feel that lasts.

NATURAL WOOD LOOK — 2-SIDED

Reversible board with two different surface finishes.

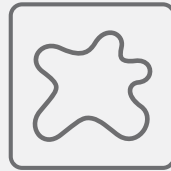

REAL WOOD

Made from carefully selected natural hardwood.

IMPROVED ANTISCRATCH RESISTANCE

Enhanced surface protection against scratches and everyday wear.

REDUCED WATER STAINS

Thicker protective layer reduces water absorption and helps minimise visible water stains.

UV PROTECTED

Enhanced UV resistance helps preserve the board's original colour for longer.

MOULD & INSECT RESISTANT

Resistant to mould, fungi and insects for reliable outdoor performance.

BAREFOOT FRIENDLY

Comfortable for barefoot walking, with a smooth and pleasant surface.

COMFORTABLE UNDERFOOT

Designed to provide a comfortable and pleasant walking experience.

ANTISLIP SURFACE

Textured surface improves grip and helps reduce the risk of slipping.

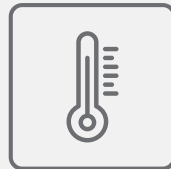

LOW MAINTENANCE

Requires only simple cleaning to keep its appearance year after year.

AGES NATURALLY OVER TIME

Naturally develops a silver-grey patina or can be oiled to maintain its original colour.

LOW HEAT ABSORPTION

Designed to reduce heat build-up for greater comfort in sunny conditions.

LONG-LASTING

Engineered for long-term durability in demanding outdoor environments.

LONG-TERM VALUE

Durable materials and low maintenance help maximise long-term value.

DECKING DESERT

Introducing the 4th Generation of WPC Decking: 3D embossed WPC boards

More than a deck. A place to live.

The best outdoor spaces are not defined by their size, but by the moments they create. Morning coffee in the sun. Family dinners that last long after sunset. Children playing barefoot. Pets finding their favourite spot to rest.

Exterra 3D Embossed is designed to become part of those everyday moments. Combining the authentic beauty of natural wood with the durability of advanced composite technology, it creates outdoor spaces that are as comfortable as they are beautiful.

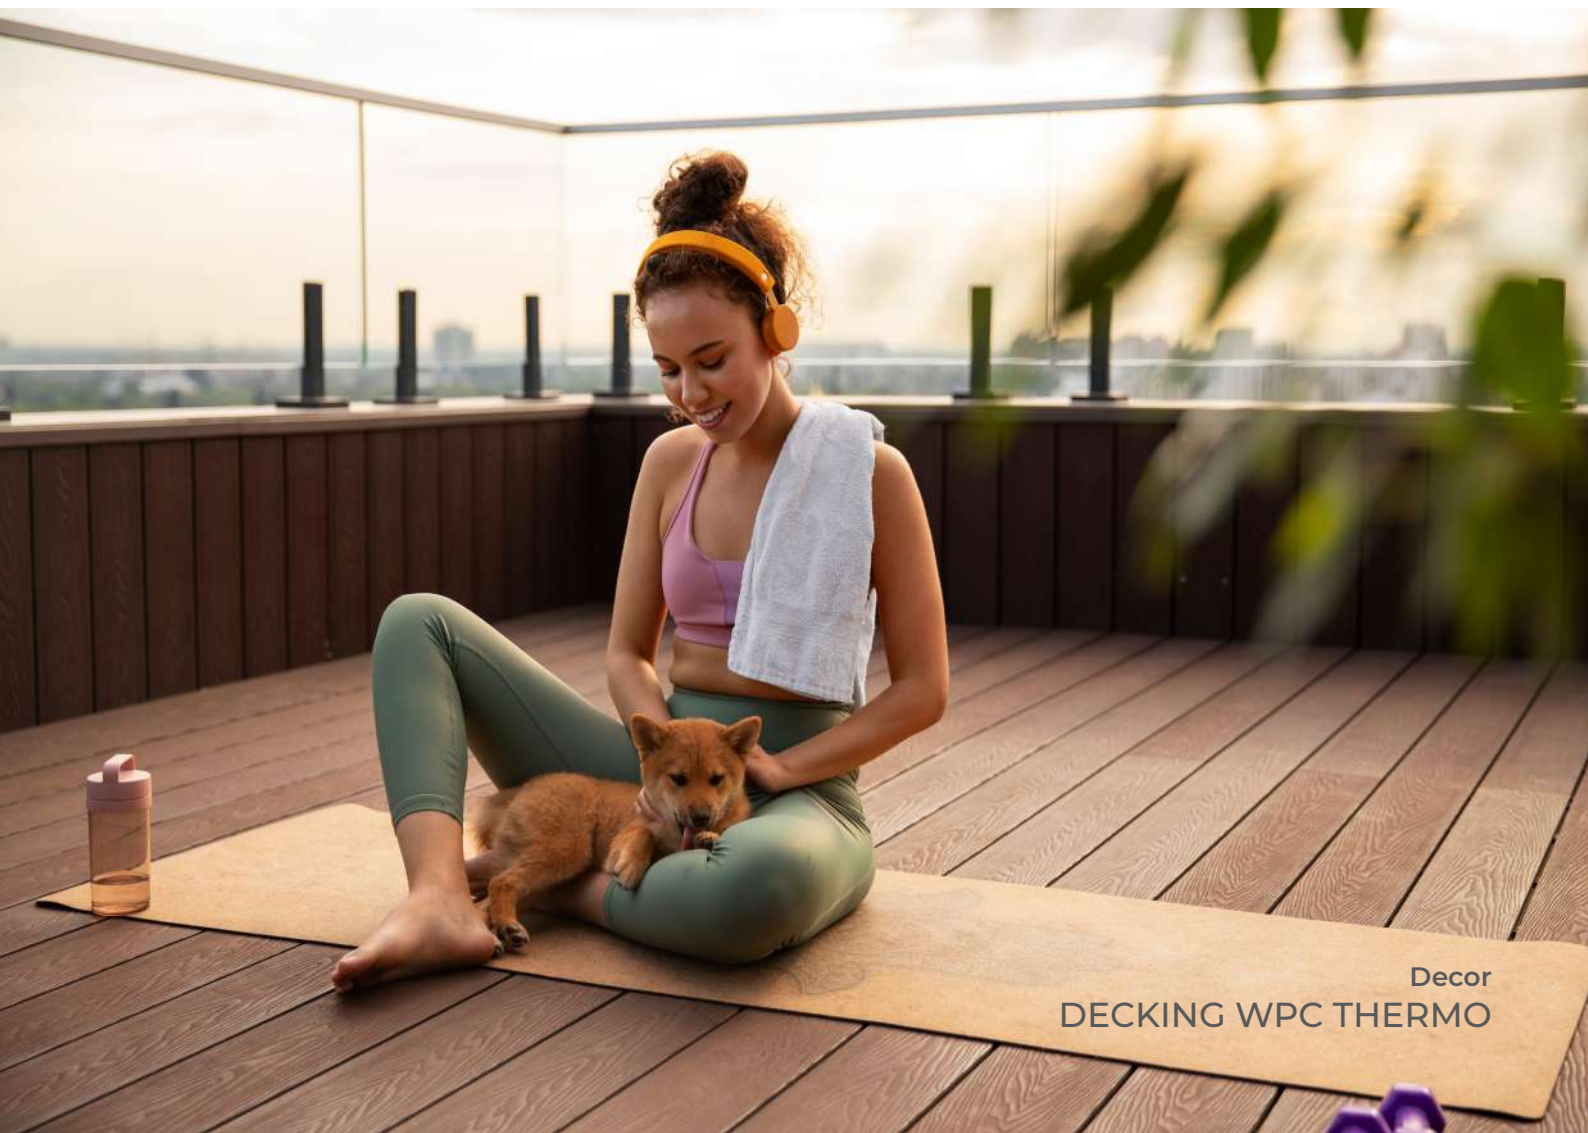

Whether surrounding a swimming pool, extending a family terrace or completing a rooftop retreat, Exterra is engineered to withstand changing weather conditions while providing long-lasting comfort and reliability.

Made for every season.

As the **4th generation of WPC decking**, Exterra introduces a new level of realism and performance. A significantly thicker protective layer allows for deeper, more authentic wood embossing while providing enhanced resistance to everyday wear, moisture and weathering.

Every board is carefully designed to capture the warmth, texture and character of real timber. Deep 3D embossing enhances the natural grain, creating a surface that not only looks authentic but also feels remarkably close to real wood.

Exterra WPC never needs sanding, staining or painting. It retains its beauty with simple maintenance, allowing you to spend less time caring for your deck and more time enjoying it.

PROTECTIVE LAYER

PROTECTIVE LAYER:

- 360° protective layer surrounds the entire board
- 50% high-performance polymers, 50% wood fibres
- Designed for long-lasting outdoor performance

CORE WPC:

- 60% wood fibres, 30% PE, 10% additives
- Engineered for strength, stability and durability

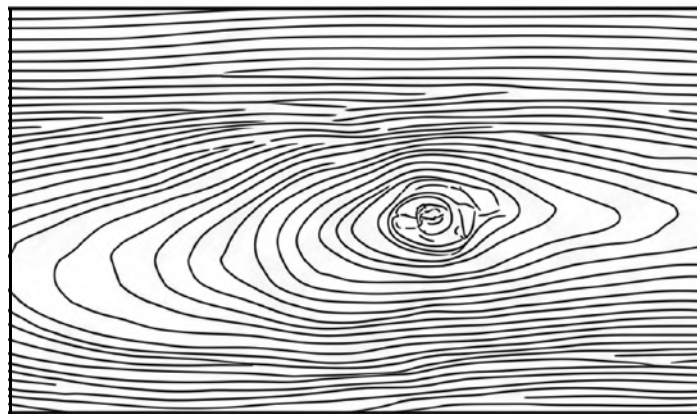

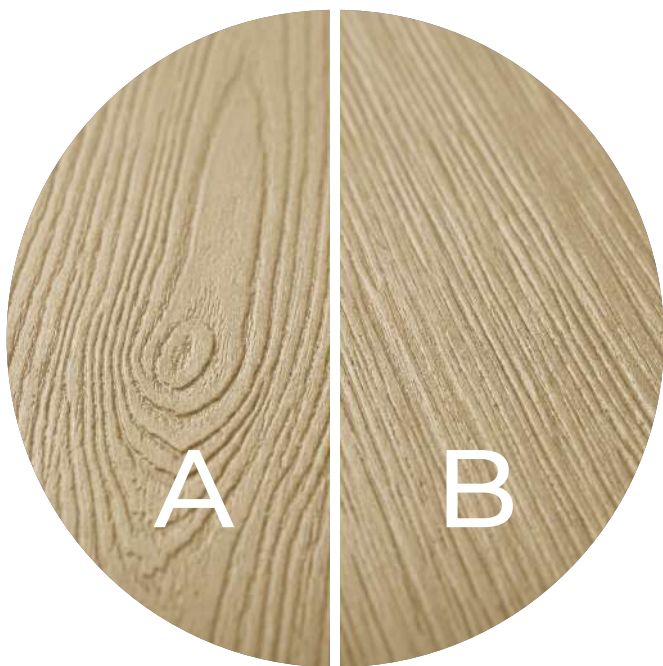

EXTRA-THICK (1.2–1.5 mm)

Enables deeper wood embossing while providing enhanced protection against moisture, water stains, UV exposure and everyday wear.

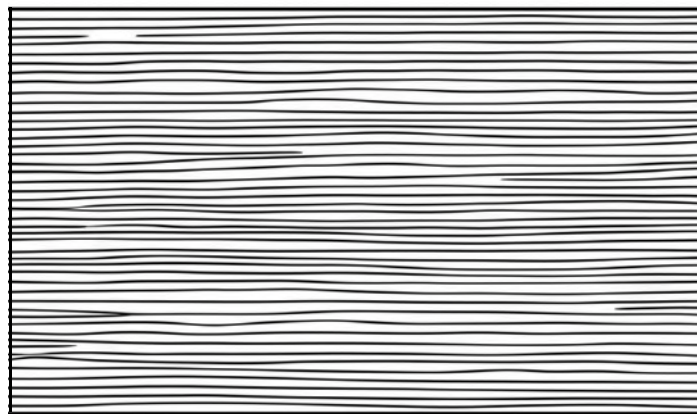

“

Designed to keep your decking looking beautiful for longer.

EMBOSSING STRUCTURE

Side A - Deep wood grain with pronounced texture for a highly authentic natural appearance.

Side B - Fine linear grain creates a clean, contemporary look with subtle wood character.

Embossed surface textures recreate the natural beauty and feel of real wood, adding depth, character and a more authentic appearance to every board.

ANTISCRATCH RESISTANCE

Durable surface helps **minimise scratches** from everyday use and outdoor furniture.

WPC Classic Decking

Proven performance for everyday outdoor living.

Some solutions remain popular for a simple reason—they work. Exterra WPC Classic Decking combines the warm appearance of natural wood with the reliability of proven composite technology, creating outdoor spaces that are built to be enjoyed every day.

Whether it's a family terrace, garden pathway or a quiet place to unwind, Classic Decking delivers dependable performance with minimal maintenance.

A trusted choice for every project.

From private terraces and balconies to gardens, cafés and commercial spaces, Exterra WPC Classic offers a practical combination of durability, comfort and lasting value. Its classic grooved profile offers a timeless appearance while helping water drain efficiently. Resistant to moisture, decay and changing weather conditions, Exterra WPC Classic is made for year-round outdoor living without the need for sanding, staining or painting.

DECKING WPC GREY

WPC CO-EXTRUDED Decking

One board. Two colours.

Exterra WPC Co-Extruded Decking features a reversible board with two distinct wood-inspired finishes. One side showcases a warm, natural wood tone, while the other offers a contemporary grey finish, allowing you to choose the style that best complements your outdoor space.

Two colours in one board give homeowners, architects and designers greater freedom to create outdoor spaces with their own character. Choose the finish that suits your project—or keep both options open until installation.

Protected from every angle.

A durable co-extruded protective layer fully encapsulates the board, providing reliable 360° protection against moisture, water stains, UV exposure and everyday outdoor wear. The result is a beautiful deck that stays easy to maintain year after year.

Designed for terraces, pool surrounds, balconies and commercial spaces, Exterra Co-Extruded Decking combines natural wood aesthetics with the durability and low maintenance of advanced composite technology.

Natural Wood Decking

Nothing compares to real wood.

There is a reason why natural wood has been valued for generations. Every board tells its own story through unique grain patterns, colour variations and natural character, creating outdoor spaces with warmth that no imitation can truly replicate.

More than a decking material, it becomes a living part of your home.

A timeless investment.

Exterra Natural Wood Decking is produced from carefully selected hardwood species, chosen for their beauty, durability and natural resistance to outdoor conditions. Every board is unique, making every terrace one of a kind.

Ideal for terraces, pool surrounds, gardens and premium

architectural projects, natural wood creates a warm, timeless atmosphere that never goes out of style.

Natural wood evolves beautifully over time. Left untreated, it gradually develops an elegant silver-grey patina that blends effortlessly with its surroundings. With regular oiling, it preserves its original colour and rich appearance for years to come.

The choice is yours—both are equally beautiful.

Where life happens naturally.

Morning coffee. Barefoot summer days. Children at play. Friends around the table. Natural wood creates an outdoor space that feels warm, inviting and effortlessly connected to nature.

Because the best outdoor spaces don't simply look beautiful—they make you feel at home.
